

BLEACH

BACTERIACIDE / BIOCID

BLEACH (Sodium Hypochlorite) is a purification and a clarifying agent used in the drilling industry.

FEATURES AND BENEFITS:

- Utilized as a clarifying agent in water-based drilling mud systems.
- Used to kill bacteria or degrade polymers such as xanthan gum.

RECOMMENDED TREATMENT:

The quantity of BLEACH required will depend on pilot testing.
1-10 L/m³ (initially) typical treatment range for water-based muds; follow up with 1L of BLEACH to 15m³ of drilling fluid.

PHYSICAL PROPERTIES:

Appearance:	Clear green-yellow liquid
Specific Gravity:	1.17
Solubility:	Soluble
pH:	>12.0

MIXING/HANDLING:

Mixes readily in water and can be mixed directly through a conventional jet hopper. Refer to the SDS for specific handling requirements.

MICROTOX[®] THRESHOLD: TBD

PACKAGING: 20L pails / 24 pails/pallet
