

DEFOAM 2000

ANTIFOAM AGENT

DEFOAM 2000 is a water-dispersible, silicone-based suspension in a mineral solvent.

FEATURES AND BENEFITS:

- Used for foam control in conventional fresh water, gel and polymer-based systems.
- Ideal for use in environmentally-sensitive areas.
- Non-toxic.
- Economical.

RECOMMENDED TREATMENT:

For de-foaming operations, use 1 pail / 16m³

As a wetting agent, use 1-2 pails / 16m³ of fluid volume

PHYSICAL PROPERTIES:

Appearance:	Milky white to tan viscous liquid
Specific Gravity:	0.85 @ 25°C
Solubility:	Dispersible
Flash Point:	> 100°C

MIXING/HANDLING:

Add through a hopper or directly into the pit. Refer to the SDS for specific precautions and handling requirements.

MICROTOX[®] THRESHOLD: < 0.5 L/m³

PACKAGING: 20L pails / 32 pails/pallet
