

## FLOOR DRY

### ABSORBENT

**FLOOR DRY** is a traditional clay-based absorbent that is very cost effective. It is highly suited for everyday industrial-site spills.

#### FEATURES AND BENEFITS:

- Is very cost effective.
- Ideally suited for industrial plant daily spills.
- Granular mesh size creates a safe, non-slip work area.

**RECOMMENDED TREATMENT:** As required

#### PHYSICAL PROPERTIES:

|                   |                               |
|-------------------|-------------------------------|
| Appearance:       | Off-white granules; odourless |
| Specific Gravity: | 1.8                           |
| Solubility:       | Insoluble                     |
| pH:               | 5-6                           |

#### MIXING/HANDLING:

Drizzle product onto oily surfaces, allow time to soak up oil and sweep up after use. Refer to the SDS for specific precautions and handling requirements.
