

## **TKPP**

### **DEFLOCCULANT/DISPERSANT**

**TKPP, Tetrapotassium Pyrophosphate**, is typically used as a deflocculant/dispersant/thinner. TKPP is a more environmentally-friendly, low-sodium replacement to SAPP.

#### **FEATURES AND BENEFITS:**

- Used to treat cement contamination and thin the mud prior to cementing.
- Effective dispersant for treating mud rings and bit-balling.

#### **RECOMMENDED TREATMENT:**

Typically, one vis cup added to the drill pipe at connections, or as required.

#### **PHYSICAL PROPERTIES:**

Appearance:	White granules
Specific Gravity:	ND
Solubility:	Soluble
pH:	10.2-10.7 (1% solution)

#### **MIXING/HANDLING:**

As per recommended treatment. Refer to the SDS for specific handling requirements.

#### **MICROTOX® THRESHOLD: TBD**

#### **PACKAGING: 25 kg bag / 40 bags/pallet**
